

# MOHAMED ASHRAF SHEHATA

## FRONT-END REACT DEVELOPER

Alexandria, Egypt | 01207330922 | hamoashraf6699@gmail.com | [GitHub](#) | [LinkedIn](#)

### PROFILE

Front-End React Developer with practical experience building responsive dashboards, management systems, and e-commerce interfaces using React and TypeScript. Experienced with authentication, CRUD screens, REST APIs, RTL layouts, and Supabase/Firebase integrations. Focused on clear components, predictable state, and interfaces that work well across devices.

### TECHNICAL SKILLS

#### FRONTEND

React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, React Router

#### STATE & APIS

Redux Toolkit, RTK Query, REST APIs, Axios, Fetch API

#### UI & FORMS

Chakra UI, Material UI, Tailwind CSS, Bootstrap, React Hook Form, Yup

#### DATA & TOOLS

Supabase, PostgreSQL, Firebase, Strapi, Git, Vite, Postman, Vercel

### SELECTED PROJECTS

#### Mohamed Ashraf Portfolio

[GITHUB](#) / [LIVE DEMO](#)

*Next.js / TypeScript / Tailwind CSS / Framer Motion*

- Built a responsive Next.js portfolio with motion, command palette, portfolio guide, SEO/Open Graph, and Vercel deployment.

#### Teacher Management System

[GITHUB](#) / [LIVE DEMO](#)

*React.js / TypeScript / Chakra UI / Supabase*

- Built an Arabic RTL system for one teacher to manage students, classes, attendance, and payments.
- Added Supabase authentication, protected routes, dashboard statistics, forms, and reusable Chakra UI components.

#### Clinic Management System

[GITHUB](#) / [LIVE DEMO](#)

*React.js / TypeScript / Chakra UI / Supabase / PostgreSQL*

- Built screens for patients, doctors, services, appointments, medical records, and public booking.
- Connected CRUD flows to Supabase with authentication, protected routes, validation, and responsive dashboards.

#### Avira Sport - Sportswear E-Commerce

[GITHUB](#)

*React.js / TypeScript / Material UI / Redux Toolkit / RTK Query / Strapi*

- Developed a responsive RTL storefront with product variants, persistent cart and wishlist, and a checkout flow.
- Used Redux Toolkit and RTK Query for state and API data, plus management screens for products and orders.

#### Modern E-Commerce

[GITHUB](#)

*React.js / Redux Toolkit / RTK Query / REST APIs*

- Created an API-based storefront with product browsing, reusable components, cart features, and centralized state management.

## ADDITIONAL PROJECTS

### Product Management App

[GITHUB](#)

*React.js / TypeScript / Tailwind CSS*

- Built a type-safe interface for adding, editing, and deleting products, including category and color selection.

### Electrical Appliances Store

[GITHUB](#)

*React.js / Firebase*

- Developed product filtering, product details, cart features, real-time data handling, and Firebase user management.

### Material UI Website

[GITHUB / LIVE DEMO](#)

*React.js / Material UI*

- Built a responsive React interface using Material UI components, consistent styling, and reusable UI patterns.

### Portfolio Website

[GITHUB / LIVE DEMO](#)

*React.js / Material UI / Framer Motion*

- Created a responsive portfolio for presenting projects and skills with reusable components and subtle motion effects.

### Email Verification System

[GITHUB / LIVE DEMO](#)

*React.js / Firebase Authentication*

- Implemented sign-up, email verification, authentication-state handling, and protected access until confirmation.

## EDUCATION & TRAINING

### Bachelor of Computers and Information

Information Systems (IS)  
Kafr El-Sheikh University  
2020-2024 | Grade: Good

### ITI - Front-End Development Training

4 Months  
Practical frontend and responsive web development

### Additional Training

Summer Web Workshops, 2022  
Coursera Frontend Course, 2024

## LANGUAGES

**Arabic:** Native    **English:** Intermediate
